

Upgrading to Version 4.0

The process to upgrade from version 3 to version 4 is a simple and straight forward process.

1. Run command: ADDLIBLE #MENU4 to add the destination library to your current library list.

```
90. Sign off

Selection or command
==> ADDLIBLE #MENU4

F3=Exit   F4=Prompt   F9=Retrieve   F12=Cancel   F13=Information Assistant
F23=Set initial menu
```

2. Run command: ADDLIBLE #MENU3 to add the source library to your current library list.

```
90. Sign off

Selection or command
==> ADDLIBLE #MENU3 *LAST

F3=Exit   F4=Prompt   F9=Retrieve   F12=Cancel   F13=Information Assistant
F23=Set initial menu
(C) COPYRIGHT IBM CORP. 1980, 2009.
```

Upgrading to Version 4.0

- Run command: **UPGMI**, and press **F4**. Review and change any upgrade parameters and then press **Enter**.

```

Upgrade MENUi (UPGMI)

Type choices, press Enter.

Source library . . . . . *DFT      Name
Destination library . . . . . *DFT      Name
Run Mode . . . . . *NONUPDATE  Name

```

Element	Value	Description
Source Library	*DFT	Use default version 3 library #MENU3.
	*ANY	The name of your version 3 library if not #MENU3.
Destination Library	*DFT	Use default version 4 library #MENU4.
	*ANY	The name of your version 4 library if not #MENU4.
Run Mode	*UPDATE	Perform the upgrade in update mode. This will move all version 3 data to version 4.
	*NONUPDATE	Run the upgrade in non-update mode. There is a report that is generated that can be reviewed before upgrading. This will alert you to any errors that may occur.

Upgrading to Version 4.0

4. Press **F8** once you are ready to upgrade. You will see the progress bar update as the upgrade progresses. Once you reach 10%, the upgrade is complete.
